

## **Manufacturing Engineer**

### **Our company**

Polyganics is an innovative medical technology company. We develop, manufacture and commercialize worldwide, innovative bioresorbable devices to facilitate tissue repair and regeneration after surgery. We adapt our versatile polymers for different applications, improving surgical outcome and patient recovery.

### **The job**

As our manufacturing engineer you will be working on the design and installation of new production lines/processes and on upscaling, improving and optimizing of existing processes. As we are a medical device company this includes collecting and recording data and writing solid reports in line with our quality system requirements. You will be involved in the assessment of security risks, the improvement of logistics and in the initiation of technological innovation.

### **Your profile**

We are looking for a self-starter and a team player who will thrive in an entrepreneurial and technology driven business environment. You have a Bachelor or MSc degree in chemical engineering or equivalent education and several years of work experience. Work experience in the medical device industry is necessary, knowledge of polymers is beneficial. Experience with lean 6-sigma or comparable programs is an asset.

This full-time position demands a high level of interpersonal skills, personal integrity and good communication skills in English.

### **Our offer**

We offer a responsible, independent and challenging position in a growing organization with the opportunity to develop yourself.

Polyganics has a professional but informal working environment, a pleasant work atmosphere and almost 50 enthusiastic colleagues. We offer a competitive salary and secondary benefits.

### **Would you like more information?**

Please contact Hans Kuijper, Manager Product Development +31 (0)50 588 6588 or Henne Barkema (HR) +31 (0)6 52 0616 35.

You can send your application to [hrm@polyganics.com](mailto:hrm@polyganics.com).
